

Northwood College for Girls Junior School Special Educational Needs (SEN) Information Report

At Northwood College for Girls we strive to support all pupils to enable them to achieve at school. In order to do this steps are taken to support them through their learning journey. Quality teaching is vital; however for some children there are occasions when further additional support may be needed to help them achieve their targets.

The Special Educational Needs (SEN) Code of Practice: for 0 to 25 years (2014) states that: 'a child or young person has SEN if they have a learning difficulty or disability which calls for special educational provision to be made for them. Where a child or young person has a disability or health condition which requires special educational provision to be made, they will be covered by the SEN definition: 'A child of compulsory school age or a young person has a learning difficulty or disability if they: (a) have a significantly greater difficulty in learning than the majority of others of the same age; or (b) have a disability which prevents or hinders them from making use of educational facilities of a kind generally provided for others of the same age in mainstream schools or mainstream post-16 institutions.'

The four categories for Special Educational Needs and Provision are:

1. Cognition and learning
2. Social, mental and emotional health
3. Communication and interaction
4. Sensory and/or physical
